

Organization Name : **Nagar Nigam, Jaipur , Govt. of Rajasthan**

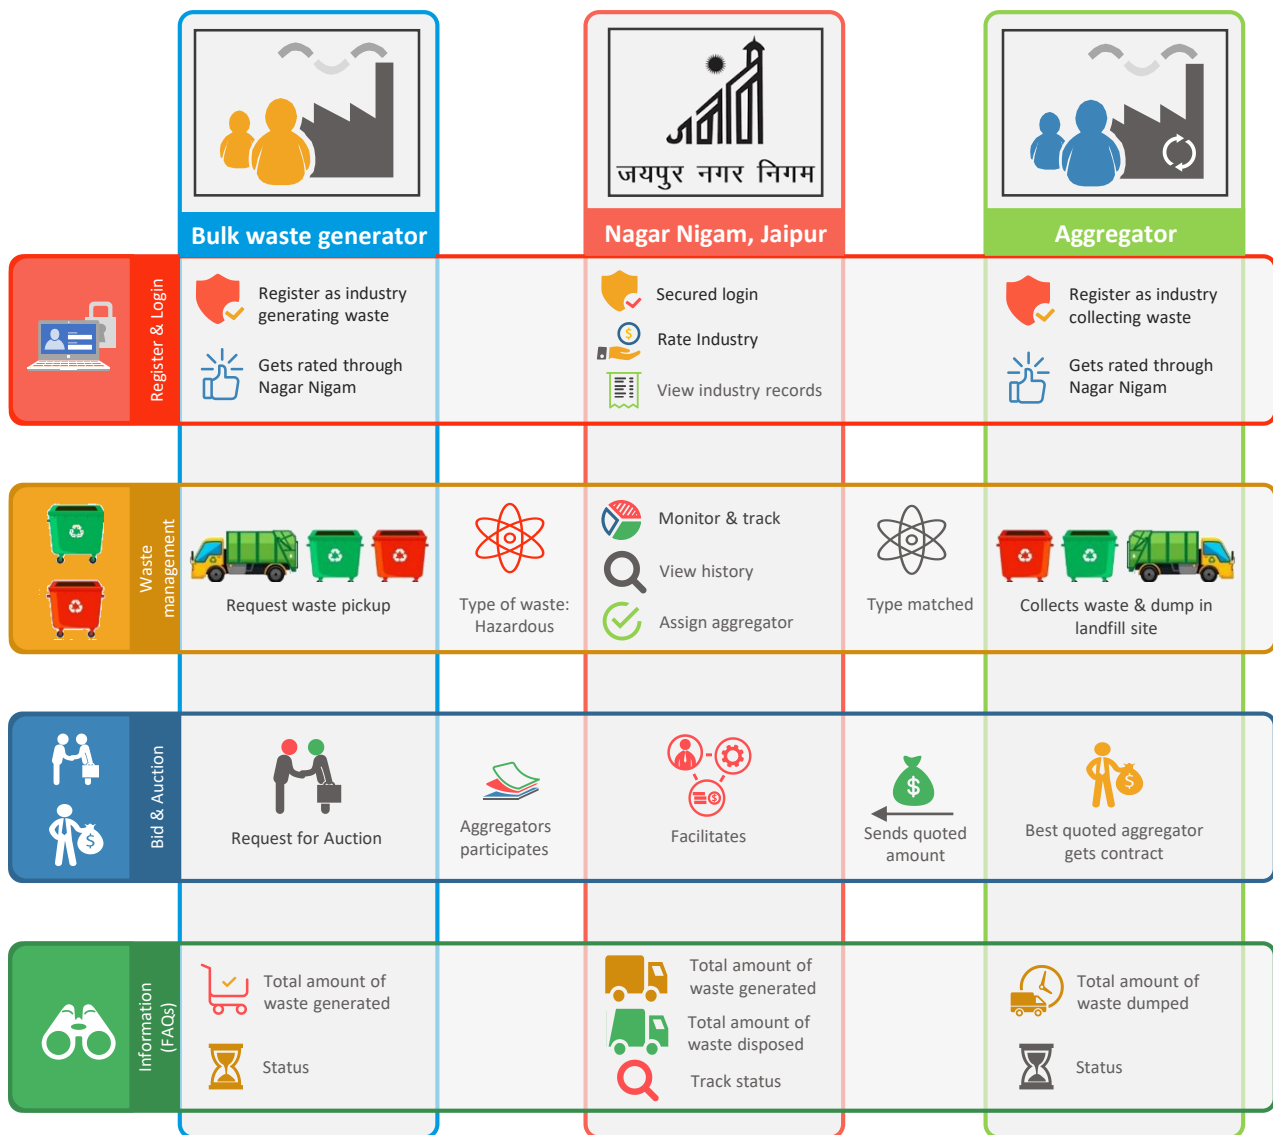

Problem Statement : **Development of Website/App for collection, transportation, disposal and segregation of waste products**

Team Name : **Brainiacs_3.4**

Team Leader Name : **Shivam**

College Code : **1-3517520220**

Idea of Approach

Note

For the sake of simple representation, Industries has been divided into two types:

Bulk Waste Generator

Industries who are generating solid waste and does not have waste treatment and disposal capabilities in house

Aggregator

Industries who collects the waste from the site and disposes it to the land fills after treating the waste appropriately

Waste Generation/ Disposal per month

Month	Waste Generated	Waste Disposed
Jan	4.3	3.8
Feb	4.4	2.5
Mar	3.5	3.0
April	4.5	2.8
May	3.8	1.0

Type of waste

Waste Type	Percentage
E - waste	42%
Chemical	13%
Hazardous	17%
Mixed	29%

Top 5 waste generating industries

Industry	Waste Volume (approx.)
Ambuja Cement	8.5
Tata Steel	6.5
AAMRITA TEXTILE INDUSTRIES	4.5
Grace Food Processing	3.5
Reliance Chemicals	3.2

Type of waste, Disposal/ Collection

Type	Disposal (Tons in 100)	Collection (Tons in 100)
E - waste	4.3	2.5
Chemical	2.5	4.5
Hazardous	3.5	1.8
Mixed	4.5	2.8
Inert	3.8	1.0

- Application will bring all the stakeholders involved in the process of waste management on a single platform so as to make the process of disposing waste seamless for industries and to help Nagar Nigam to keep the landfills free of harmful wastes.
- Application will allow Bulk waste generators to raise a request for the collection and disposal of waste.
- Nagar Nigam can now facilitate and monitor the process of waste disposal at every stage – collection, segregation, disposal etc. with the help of the proposed system
- The system will enable Nagar Nigam to connect Aggregator with the suitable Bulk waste generator.
- Nagar Nigam can closely watch the request raised, served and not served for waste disposal with the help of info-graphics represented on dashboard
- Industries can auction the waste available and also place a bid on the actionable waste with the help of the proposed system
- The system will allow Industries to collaborate and support each other by knowledge transfer or by defining process of waste management for them

BULK GARBAGE GENERATOR

Pick my waste

- Submit application for waste collection
- Handover waste to aggregator
- Track the status of waste till arrival at Segregation Unit
- Search Open requests
- View history

Place a bid

- View auction request of other industries
- Place their bid
- View status of auction

Buy my waste

- Submit application for available waste for auction
- Set start date and end date for auction
- View details of Industries who have placed bid
- Accept a bid

Suggest me a plan

- Submit request for waste inspection
- View responses against request
- Accept/ reject a suggestion based on number of likes by other industries on a suggestion

AGGREGATOR

Dispose Waste

- Accept the assignment for waste collection by Admin
- Collect waste from site
- Transport waste to Segregation Unit
- Treat Waste
- Dispose on Land fills

Collaborate

- View open requests for waste inspection
- Suggest a response to open request – share knowledge
- Accept the request for inspection
- Find an Inspector for waste
- Send inspector to site

Treat waste

- Receive waste at Segregation Unit
- Find type of waste received at segregation unit
- Treat the waste based on the category
- Collect the Reusable parts generated after the treatment
- Collect the waste to be disposed

Auction Waste

- Submit Details of recyclable waste collected after treatment
- Set start and end date for auction
- View the bids placed by industries
- Accept one bid out of many placed by industries

NAGAR NIGAM

Monitor and Facilitate

- Track the requests raised for waste collection and disposal
- Suggest waste management plans to the industries asking for inspection of waste
- Connect Bulk waste generator with aggregator
- Reward Industries disposing wastes properly

Approve Profiles

- View submitted applications to be a part of system as an aggregator Industries
- Approve/Reject applications of aggregator

Assign Aggregator

- View the request received for waste collections
- Select the aggregator from the list of aggregator suggested by the system through an algorithm
- Specify reason in comments for the selection of particular aggregator
- Assign the Aggregator

Insights from Data

- Plot graph for waste generated against waste disposed
- Waste generated monthly per year
- Plot graph of Industries who disposed maximum number of waste appropriately against generated by them.

On-boarding Stakeholders on application

- Profiles for the user of Jaipur Nagar Nigam will be created beforehand for the proper functioning of system.
- Profile of Aggregator type Industries has to be approved by Nagar Nigam (Admin) after they register in order for the aggregator to be able to use system.

Information

- Information regarding type of waste, available quantity of waste and date of waste generation will be provided by Bulk Garbage generator Industry appropriately.
- Information regarding amount of waste disposed, waste recycled will be provided appropriately by the Aggregator

Infrastructure

- All the stakeholders involved have basic IT infrastructure to run the web application
